Apprenticeship News Update : Co-Investments

From April 2024, the government will fully fund apprenticeships for non-levy paying employers hiring apprentices aged 16 to 21. This removes the 5% co-investment requirement for these employers, making it more affordable for SMEs to take on apprentices

Key Term of the Month : Co- Investments

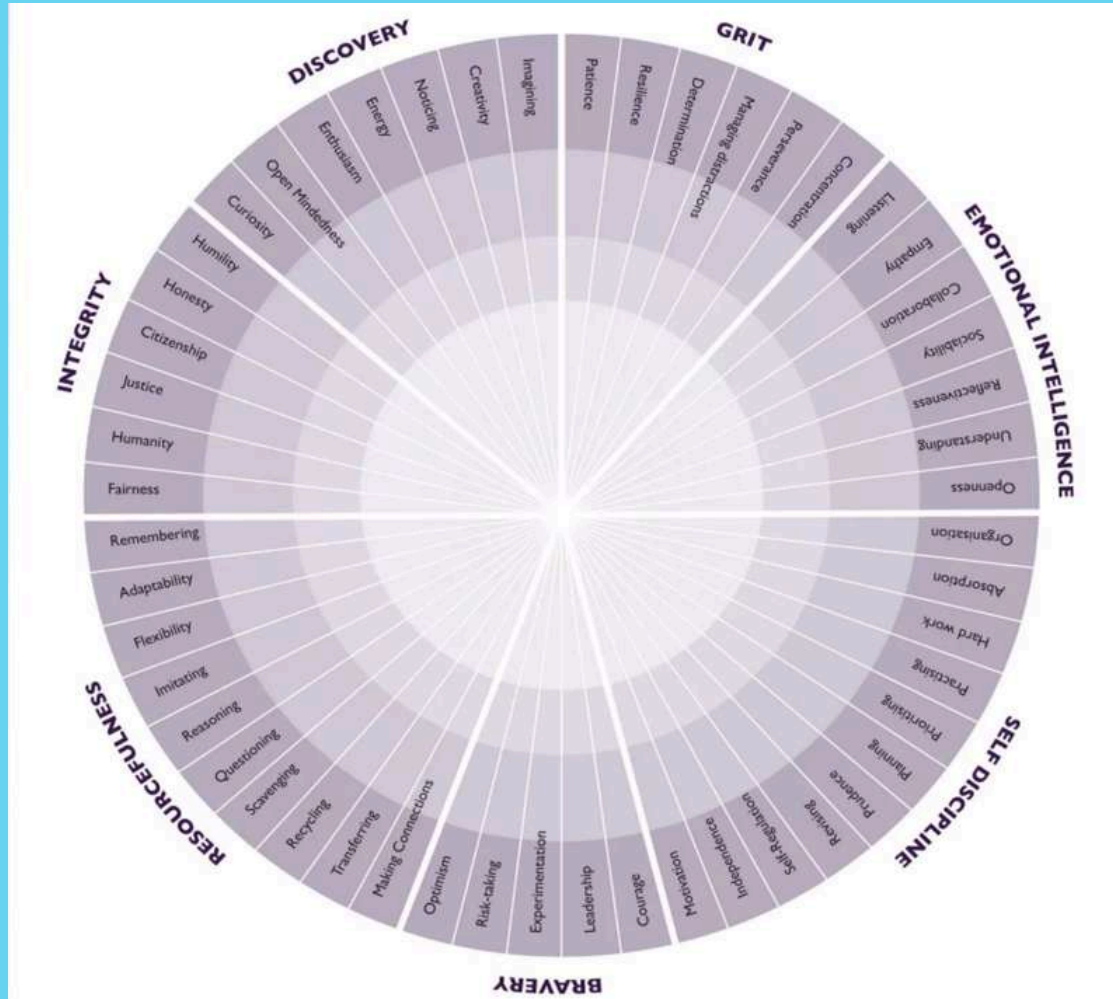

In UK apprenticeships, co-investment means that employers share the cost of training and assessing their apprentices with the government. Currently, employers contribute 5% towards the cost of apprenticeship training, while the government covers the remaining 95% up to the funding band limit for that apprenticeship. This arrangement aims to encourage more employers to invest in developing skilled workers through apprenticeship programs.

20% Of the Job Idea as Employer arrangement:

Mentoring and Coaching: Pairing apprentices with experienced mentors or coaches provides invaluable support and guidance throughout their apprenticeship journey. Mentors can share their knowledge, provide feedback on performance, offer career advice, and help apprentices navigate challenges they encounter in their roles.

A typical day in a nursery starts with children being welcomed and settling in with free play. Throughout the day, there are structured activities like arts and crafts, story time, and outdoor play, as well as scheduled meals and nap times. In the afternoon, children engage in more activities or free play until parents pick them up. The focus is on keeping children engaged, learning, and safe.
